

Making a Tangram

Disha Kuzhively

- Step 1. Take a sheet of paper and cut out a square.
- Step 2. Cut the square into two congruent triangles.
- Step 3. Take one of the triangles and cut it again into two congruent triangles.
- Step 4. Take the larger triangle that is left. Find the midpoint of its longest side and press the paper there to mark it.
- Step 5. Fold the vertex opposite to the longest side of the triangle down to the middle point you marked. Cut off the small triangle made by the fold.
- Step 6. Fold the trapezium to get two congruent trapeziums.
- Step 7. From one trapezium, cut out one square and one right-angled triangle.
- Step 8. From the other trapezium, cut out one parallelogram and one right-angled triangle.

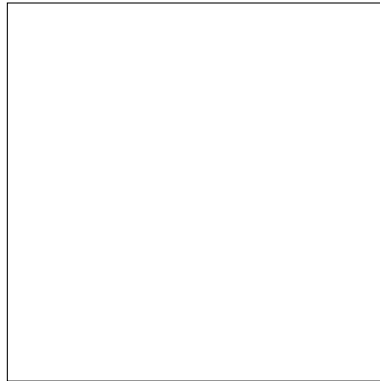

Figure 1: Step 1: Take a sheet of paper and cut out a square.

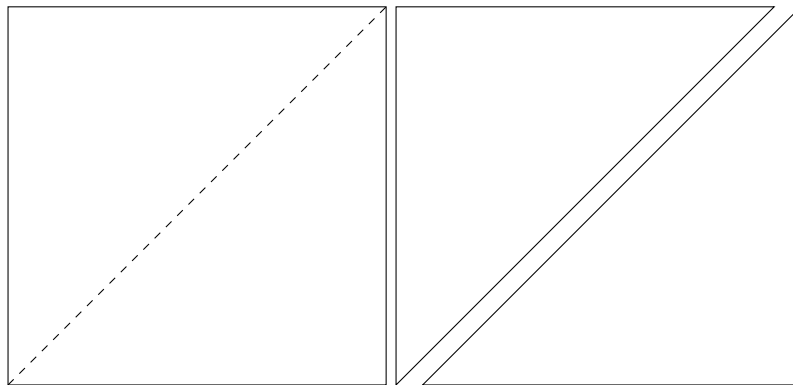

Figure 2: Step 2: Cut the square into two congruent triangles

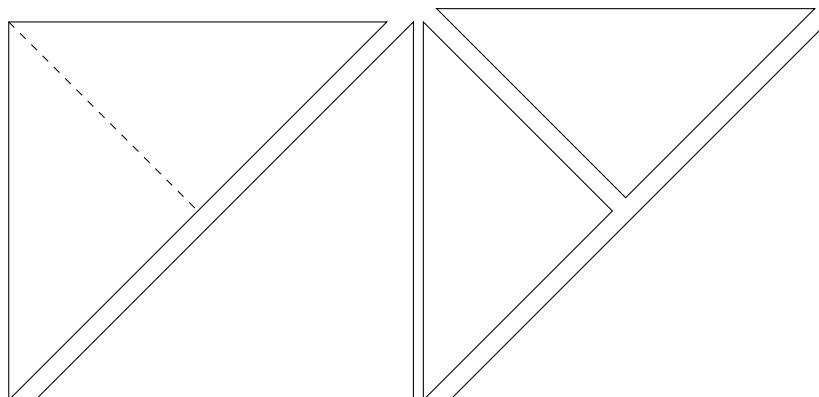

Figure 3: Step 3: Take one of the triangles and cut it again into two congruent triangles

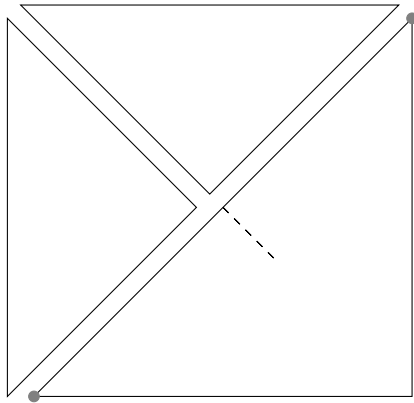

Figure 4: Step 4: Take the larger triangle that is left. Find the middle point of its longest side and press the paper there to mark it.

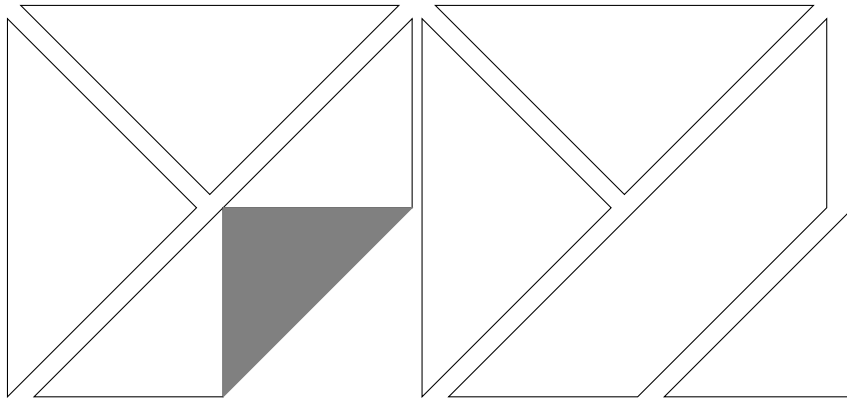

Figure 5: Step 5: Fold the vertex opposite to the longest side of the triangle down to the middle point you marked. Cut off the small triangle made by the fold.

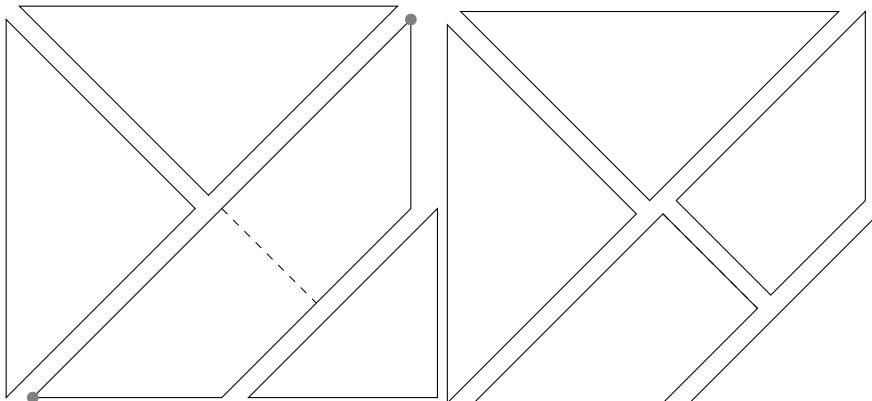

Figure 6: Step 6: Fold the trapezium to get two congruent trapeziums.

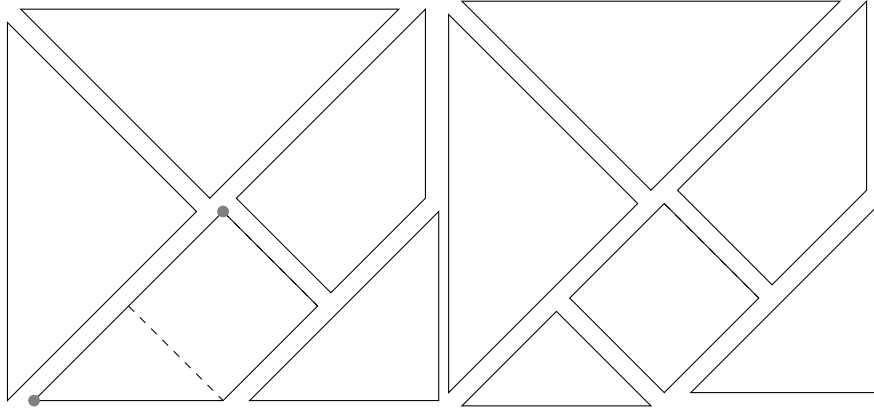

Figure 7: Step 7: From one trapezium, cut out one square and one right-angled triangle.

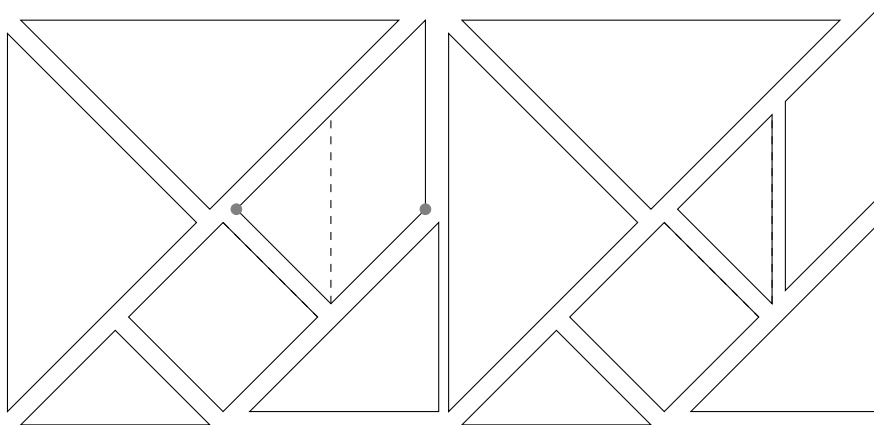

Figure 8: Step 8: From the other trapezium, cut out one parallelogram and one right-angled triangle.
