

Ben Sparks
Katie Steckles

Brian Tyrrell-Nic Dhonncha
Fran Watson
Katherine Holmes
Ayesha Hussain
Kasia Wyczęsany
James Timmins

Four words:

Audience:
when people say "general public", ask what part of the general public

Context: weather, venue
Aims
Budget: Money, time

In-person: Talk, Seminar (research), Comedy, Exhibition, Stall, Event Production, Workshop, Busking
PPIE(Patient)

Online: Video, Blog/website, Podcast, Livestream, Social Media,

Media: Books, Magazine, TV/Radio

Aim:

Example: year 9, advanced maths session
aim could be to increase the number of enrollment

What's the audience's aim vs. what's the organiser's aim for the audience

Budget:
What to tell people who have "a lot of budget" when it comes to conducting the workshop but not when it comes to p

Use Voice:
Pause after telling a joke

Eye contact:
Look at the camera in online meetings

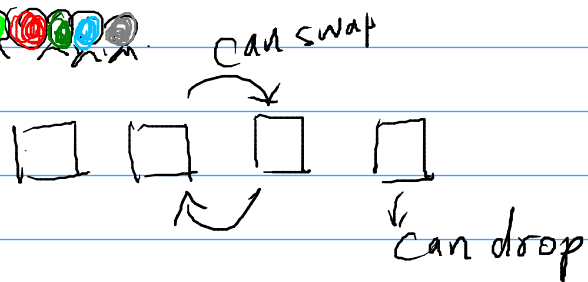

WWW: What went well
EBI: Even better if

Reflection

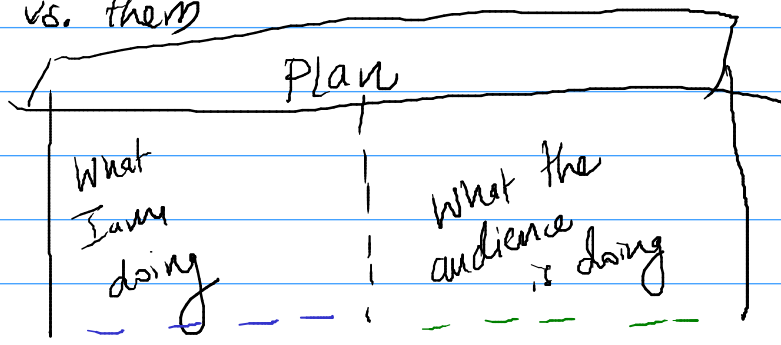

What?
So what? (how did the audience react to it?)
Now what? (how will I do it differently?)

① Segmented Approach

gives flexibility

② You vs. them

Put the parts where audience does things, see the way its distributed through out

③ Preparation

Demo → create a video for backup

have a fallback plan
cables, etc.

Katie: can you do a what's in my bag - bag that you pack for workshops

④ Steeping

Allow time to read, learn

⑤ Be Brutal

Don't have to fit everything in the session
Too much content is bad

⑥ Make it move

graphic on the screen
should move

Put a hand up if ...

Give us a cheer if you have heard of this ...

Thumb thermometer

Take care of your volunteer, provide clear instructions, say, I need a volunteer for, "explain, provide specifics"

Hands-on

1. Practical considerations — cost, robustness, accessibility

2. Do the thing — physical

3. Demos vs. instructions vs. playground

4. Differentiation

having multiple versions of the same thing

have color pens and paper

5. Giveaways

→ flipping tricks

↘ Marketing

6. No impossible tasks

→ Königsberg bridge
as an activity in

or provide a possible option

don't let them struggle for long time

Story

Comedy

→ setup

① Penny drop

moment of realisation

2. Punline

let the punchline stay, give it time

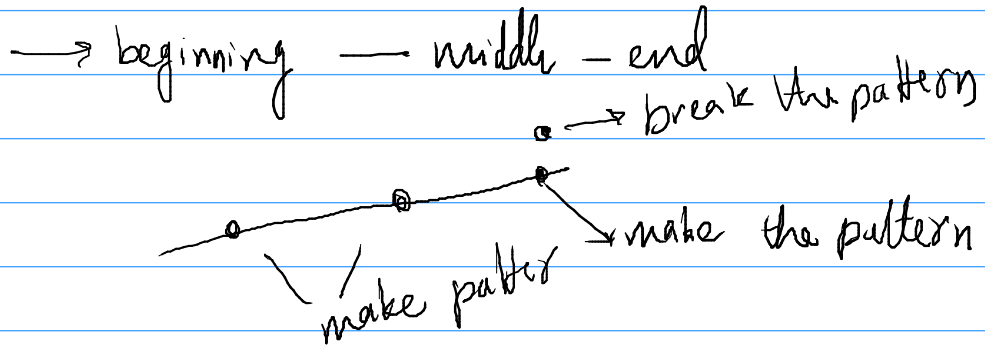

3. Callbacks

Making reference to the thing that happened previously
familiarity

4. Audience control

stage positioning → having a spot and establish it
have a timer

5. Rule of 3

Magic

→ do not ever make them feel
that Maths is magic

356 3 digit whole number

356356 type it again

divide by 5? remind why what you are doing is impressive

divide by 7?

divide by 13?

divide by 11

number I started with

$$a \times 10^5 + b \times 10^4 + c \times 10^3 + a \times 10^2 + b \times 10 + c$$

$$7 \times 11 \times 13 = 1001$$

→ Setup / Twist / Reveal

Hook → Content → Punchline

Topic Quantum Cryptography

Audience: Age 15-30, People who registered to attend

Hook: solving caesar ciphered messages as they enter

Content: ask to design a better encryption method
getting them to see how different quantum cryptography is as to classical
Card game

Punchline:

Brian
How to know what the student is thinking
embodied cognition
Gestures

Ask the student to gesture
